The Managing Executive
Drug Detective (Pty) Ltd
Dr Andrew Nathaniel

Letter of Recommendation

With reference to your surface drug detection kit "Drug Detective" supplied to the Tshwane Metro Police Department for field testing over the past month.

We have tested the samples supplied to us and are very pleased with the results obtained. There were no failures and in each case where drugs were detected the suspects were arrested and charged.

In certain cases where the kits showed a negative result suspects were immediately released.

This department is of the opinion that the "Drug detective" is an ideal screening tool in the field and is able to detect not only the use but more important the handling of drugs.

South Africa and Tshwane in particular have no place for the illicit trade and use of drugs and the TMPD embraces a zero tolerance approach to the abovementioned offences. Our Social responsibility role will undoubtedly be strengthened by the use of this kit and we look forward to making our city drug free zone.

Yours Sincerely

Mel Vosloo
Director Communications

Hlula Msimang
Chief of Metro police
